@micalbozz156	Unfortunately doesn't work for me. It always responds with "Hmm, I'm not sure".	Offensive
@senorchavo5572	I need troubleshooting assistance. I csn get everything connected...independently openai will respond. When i link pinecone...it will receive the vectors from the pdf when connected...but he dumb ass assistant when asked about the document says hmmm i dont know! ■ is ir the splitter overlap...its a larger pdf...i do legal work so its case law in trying to load and ask questions	Offensive
@sanderschat	funny to read all them comments from 'non-coders', thinking they too finally can add cool chatbots to websites for their clients... sure...It is the same like AI is producing some crappy music, and then they say 'Ah, me as a non-musician can finnaly create music and sell it to the world'... sure....	Offensive
@dheerajsachdeva5735	I am stuck at this error: docker-flowise-1 Error: ENOENT: no such file or directory, mkdir. Any ideas?	Offensive
@seetheworld3839	Don't know why but my pdf was of 818 pages and it wasn't working accurately as I was expecting it to work	Offensive
@davedumas0	i have an idea for a video series for you "gpt-4-code interpreter vs gpt-4 with combo of plugins"	Offensive
